

## Supplying field-proven technologies worldwide

### Compression and Power Products

- Reciprocating Compression
- Rotary Screw Compression
- Remanufactured Compression
- Compressor Optimization
- Power Generation
- Combined Heat and Power Units
- Exhaust Gas Treatment
- Standard or Custom-Designed
- Onshore or Offshore

### Project

Find a way to reduce the costs of transporting twenty 1,005 hp rotary screw compressors from Calgary, Canada to Brisbane, Australia for a large coalbed methane project.

### Location

Brisbane, Australia

### Result

Enerflex engineered, designed and fabricated the compressor package modules so they could be disassembled and shipped in standard containers to Australia – dramatically reducing freight costs. The packages were reassembled by Enerflex in Australia. Enerflex completed all 20 units on schedule within eight months of the purchase order.
